

Why are the sidewalks so high?

Post visit discussion and activity

The postcard below shows a walking bridge that was built over Bullard Street in the late 1880's. Why do you think this bridge was built? Did the WPA build it?

This sidewalk is stamped: WPA 1938

Take a walk downtown and carefully observe the sidewalks you are walking on. What other WPA dates can you find?

Did any of your relatives help build these sidewalks?
